[A Mind for Numbers - Stanford Medicine](#)

Barbara Oakley, author of A Mind for Numbers. Though the title promises improvements in math and science, its lessons are applicable to all forms of learning and problem-solving. Barbara explains that learning begins with creating and internalising small chunks of information (e.g., starting a car, pressing the accelerator, changing gear). As we learn we add to and connect these chunks and use them to solve problems in the world around us (e.g., driving).
